CAREER OBJECTIVE

To pursue a responsible position in a reputed organization where I can effectively apply my skills, enhance my professional knowledge, and contribute meaningfully to the organization's success while advancing my career.

EDUCATION

Dr.N.G.P. Institute of Technology	2023 - 2027
B.Tech Artificial Intelligence and Data Science	
• CGPA : 8.57(till 5 semester)	
Literacy Mission Matriculation higher secondary school	2022 - 2023
High Secondary School	
• 89%	
Literacy Mission Matriculation higher secondary school	2020 - 2021
High School	

PROJECTS

AI Recipe Generator Website	2025
- Developed an AI-powered Recipe Generator web application using React and Google Gemini API that creates customized recipes based on user-provided ingredients. - Implemented multilingual support (English, Tamil, Hindi) and an interactive UI to enhance user experience and accessibility.	
Data Visualization Website using Python	2024
The objective of the Data Visualization project was to transform raw data into meaningful insights using Python. I used Pandas and NumPy for data cleaning and analysis, and Matplotlib to create visualizations such as bar charts, pie charts, line graphs, and histograms. This project helped me understand data preprocessing, analysis, and visualization techniques..	
AI Crop Advisory System	2025
Developed an AI-powered agricultural advisory platform that provides crop recommendations, disease identification, weather-based guidance, and multilingual chatbot support to assist farmers in making informed decisions.	
AI Interview Preparation System	2026
Built an AI-powered interview preparation platform that generates technical and HR interview questions, evaluates responses, and provides personalized feedback to help users improve their interview performance.	

INTERNSHIPS

Appin Technology, Coimbatore, Tamil Nadu

2023

- Attended internships for 15 days on data science with python there I learned various python libraries like matplotlib pandas and done projects related to it.

AREA OF INTEREST

- Software Programming
- Front-End Web Development
- Full-Stack Development
- Data Analyst
- AI Engineer

TECHNICAL QUALIFICATIONS

- Programming Languages: Java, Python, SQL
- Frontend Technologies: HTML, CSS, JavaScript, Bootstrap, React.js
- Data Analytics & Visualization: Power BI
- Development Tools: Visual Studio Code

CO-CURRICULAR HACKATHONS

- Hackathon (Madras Institute of Technology, Chennai), 2025– Participant: Developed a full-stack web application for buying and selling upcycled products.
- Paper Presentation (Bannari Amman Institute of Technology),2024 – Participant: Presented a paper on **Ethical and Social Implications**, focusing on the impact of technology on society.

CERTIFICATIONS

- NPTEL: IoT 4.0(2024) , Social Network(2025), Human Computer Interaction(2026)
- Simplilearn : Power BI for Beginners(2025)
- LinkedIn learning certifications

PERSONAL DETAILS

- **Languages:** Tamil ,English
- **Date of Birth :** 17/11/2005
- **Personal Qualities :** Creative and Analytical Thinker ,Problem-Solving and Decision-Making ,Team Collaboration and Leadership ,Effective Communication Skills ,Adaptability and Quick Learning ,Time Management and Organizational Skills ,Innovative and Goal-Oriented Approach .
